

ACCESSORIES FOR SZE2 CABINETS

LIFTING ACCESSORIES

Lifting angle

Eyebolt

Lifting accessories

Fixed to threaded holes in the top plate of the cabinet's frame or (when the roof is used) to fixing/spacer bolts.

Offered in two options:

- 1) eyebolts - galvanised steel, eye diameter: 30 mm, thread for fastening: M12;
- 2) lifting angle for cabinets bayed in rows - galvanised steel angle, lifting hole diameter: 38 mm, two holes for mounting screws M12.

Scope of delivery

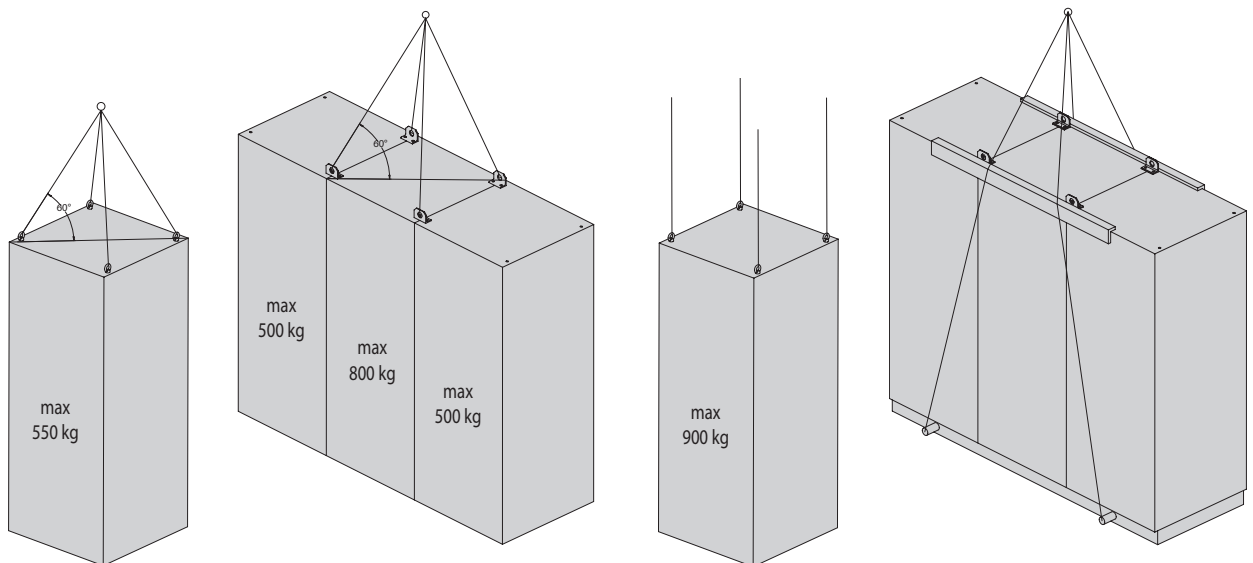

Lifting accessories are sold separately.

Lifting angle is supplied with mounting screws.

Product name	Package	Catalogue number
eyebolt	1 pc.	M1F-00-0106
lifting angle	1 pc.	WZ-1951-68-00-000

TRANSPORT OF SZE2 CABINETS

For larger loads, a set of cabinets should be preferably placed on a single shared welded plinth which reinforces the entire structure during transport. For advice on selection of an appropriate plinth type, please ask ZPAS S.A. design department.
